

Ecology Colloquium summer term 2024

Jointly organized by the Departments of

Landscape Ecology & Vegetation Science, Plant Ecology,
Ecology of Tropical Agricultural Systems, and Applied Entomology

Tuesdays 14:15 - 16:00, in person

Lecture hall: HS 1

Date	Speaker	Topic
09/04/2024	Prof. Dr. Martin Bouda	Plant vascular networks mediate ecophysiological function across scales
30/04/2024	Prof. Dr. Mutez A. Ahmed	The hidden half of plant water relations: root-soil interactions impacting plant response to drought
02/05/2024, note: extra-day on Thursday, Room: HS 17!!	Prof. Dr. András Baldi	Maximizing engagement in intergovernmental bodies: high-impact papers, diverse networks, and unexpected insights
07/05/2024	Dr. Alice Exnerová	Aposematism and mimicry: a bird's-eye view
28/05/2024	Prof. Dr. Catrin Westphal	Diversification strategies for more sustainable cropping systems
04/06/2024	Prof. Dr. Elisabeth Obermaier	Biodiversity research in botanical gardens
18/06/2024	Prof. Dr. Jonathan Gershenzon	<i>tba</i>
25/06/2024	PD Dr. Matthias Schleuning	Understanding the ecosystem-level consequences of biodiversity loss using functional traits
02/07/2024	Dr. Jens Mutke	Regional biodiversity in global environmental and climate change
09/07/2024	Prof. Dr. Severin Irl	The ecology and biogeography of quartz islands in South Africa
